SEMINAR IN ONE HEALTH PROBLEM SOLVING

Offered in Fall

FALL 2024 SEMESTER

Schedule TDB based on student availability

DESCRIPTION

This is a special topic, 1 credit discussion course that will explore the interdisciplinary origins and interdisciplinary foundations of Global One Health, as well as delve into its utility as a framework for analyzing emergent issues in our modern world. The format of the course is faculty and student led discussions with the goal of reviewing a topic in One Health with a written product at the end of the course.
