

UNDERGRADUATE MINOR OF GLOBAL ONE HEALTH

REGISTRATION OPENS **SUMMER 2024**

DESCRIPTION

The **Global One Health minor** is a 15-credit program exploring the interconnections between **human, animal, plant, and environmental health**. Students employ interdisciplinary perspectives and systems thinking to key Global One Health issues including emerging **infectious diseases**, challenges to sustainable **food and water** sources, and **climate change** and related **health disparities**.

The minor offers flexibility in course selection, catering to various interests and career goals in Global One Health. Through a curriculum that includes foundational courses, specialized electives, and experiential learning opportunities, students will gain **critical skills** and experience to address **complex global challenges**.

PLAN REQUIREMENTS - 15 CREDIT HOURS

GOH 201 - Foundations of Global One Health (3 hours)

GOH 302 - Global One Health Applications (3 hours)

Electives - Select 1 from each of the 3 groups (9 hours)

- Integrated Human and Animal Health Perspectives
- Sustainable Food Systems and Plant Health
- Ecosystem Health and Climate Science
