

One Health is a collaborative research framework that recognizes the interconnectedness of the health of humans, animals, plants, and the environment. It brings together scientists and practitioners from diverse disciplines to work toward improving the health of these systems simultaneously, from local to global scales. To advance research and professional development opportunities for graduate students working on global challenges through a One Health approach, we are pleased to offer the **Global One Health Academy Graduate Travel Award**.

This travel award will support 3-5 graduate students per year for international or domestic travel that **advances their global One Health-related research**. Travel could be for field work, data collection and analysis, workshops and training on new methods and approaches, other opportunities that will advance research theory or practice, or conferences and other venues where research findings will be disseminated to the scientific community or the public. Award amounts are available **up to \$1,500 for domestic travel and up to \$3,000 for international travel**. There will be two application cycles per year: the current call will support **travel occurring January through June 2026**.

### **Eligibility:**

To be eligible for this award, the applicant must be a graduate or professional student at NC State with **One Health research** relevant to one or more of the Global One Health Academy thematic areas, which include: **food and water solutions, infectious diseases, and/or climate and global change**. Graduate and professional students from disciplines across all of NC State's colleges with relevant research are encouraged to apply. For this cycle, all awarded funds must be used by June 30, 2026.

### **To apply:**

The application consists of three parts:

1. A research statement that describes your research and clearly demonstrates its relevance to One Health and one or more of the Global One Health Academy thematic areas. This statement should be written so that it is accessible and compelling to faculty from broad disciplinary backgrounds spanning the sciences, social sciences, and humanities. *Limit 500 words.*
2. A description of the research opportunity, training/workshop, or conference that you plan to attend using these funds and how you will benefit from receiving this award. This section should address the travel opportunity in terms of both how it will advance your research and how it will enhance your professional development. *Limit 500 words.*
3. A budget justifying the requested funds. Allowable expenses include ground or air travel, lodging, per diem food expenses, required research supplies, conference/workshop registration fees, or other costs directly related to the proposed research-related travel or conference/workshop attendance. This award will fund at most \$1,500 for domestic travel or \$3,000 for international travel, but budgets should list all anticipated expenses. If expenses exceed the award amounts, please list anticipated sources for additional funding that can cover any necessary overages. Regardless of whether the budget is within or exceeds the

award limit, if other funding sources will be supporting your travel for this opportunity, please ensure that they are also reflected in the budget.

*Responses to these three components should be submitted as a single PDF.*

**Applications for the Spring 2026 Global One Health Academy Graduate Travel Award will be accepted [here](#) through 11:59pm on Sunday, October 12, 2025.** Funding decisions are anticipated by early November.
